Abstract (en)
[origin: EP1965011A2] The section (2) has an insulating line (10) engaged in an outer shell (8) and an inner shell (9) in U-shaped retainer grooves (12a, 12b, 13a, 13b). An outer surface of an outer wall of the insulating line with an adjacent external limiting surface of a wall of the inner shell forms common bearing plates (16, 18), where an inner area of the insulating line is foam-filled. The outer wall of the insulating line is provided with a retainer groove for a middle sealing.
