Abstract (en)

[origin: DE102005061867A1] The protective hood (1) has a clamping device for fitting it to the machine neck of the tool, and locks into position. A turning lock element (19) is fitted immovably to the clamping ring (7), to act with a turn lock counter-element on the machine neck. A tool adapted for the convenient fitting of such a hood is also described.
