Abstract (en)

[origin: WO2007068415A1] The invention relates to a sheet-fed printing press, having at least one offset printing unit and/or varnishing unit and/or flexographic printing unit for printing printed sheets with at least one printing image, having at least one inspection device for detecting and evaluating the or each printing image which is printed onto the printed sheets in the or each offset printing unit and/or varnishing unit and/or flexographic printing unit, and having at least one inkjet printing device and/or laser printing device which is integrated into the sheet-fed printing press for printing printed sheets with at least one further printing image. According to the invention, alternatively and/or in addition, the or each further printing image which is printed onto the printed sheets by the or each inkjet printing device and/or laser printing device can be detected and evaluated by the or each inspection device.
