Abstract (en)

[origin: WO2007073825A2] The invention relates to a method and a device for producing construction elements, in which a reactive polyurethane (PUR) mixture and solid particles are applied to a nonwoven fabric, a density of 0.01 to 10.0 g of solid particles per cm<sup>2</sup> of coated nonwoven fabric surface being set, whereupon the nonwoven fabric that has been coated with the not yet fully reacted reactive polyurethane mixture and contains solid particles is pressed and cures.
