Abstract (en)
[origin: WO2007073905A1] The present invention relates to a connecting element (1) for a Bowden cable sheath (4), comprising an essentially tubular spring element (10), at least one holding projection (20, 26) for latching the Bowden cable sheath (4) to the connecting element, wherein the holding projection (20, 26) is arranged within the tubular spring element (10), and wherein the holding projection (20, 26) is resiliently biased in direction of the outer surface of the Bowden cable sheath (4) by means of the tubular spring element (10).
