Abstract (en)
[origin: WO2007077163A1] An oven (1) comprising a cooking chamber (2) and one or more lateral supports (3) for carrying trays or wire racks. The lateral supports (3) are formed oppositely on the side walls of the cooking chamber (2) . A baking tray (8) has at least two stoppers (11) situated on its corners, thus forming a protrusion on the tray surface . A wire rack (4) has a frame (5) . When the wire rack is placed on the tray (8) and moved into the cooking chamber conjointly, the sides of the frame sit on the lateral supports (3) of the cooking chamber. At least two bending curves (7) situated on at least two of its corners, provide the frame (5) to bear on the stopper (11) by being slightly flexed.
