Abstract (en)
[origin: EP1967459A1] The invention relates to a bag for fruit and vegetable products, of the type that comprises a mesh bag body which is made from a thermoplastic material. According to the invention, the end openings, which are used close the bag, are tightly closed and surrounded by an attachment belonging to the label hanging from the bag. In addition, ribs are provided on the faces of each opening, which are made from the same molten material as the bag and which extend across the entire width of the opening, such as to prevent the longitudinal or transverse rupture of the welded opening.
