Abstract (en)  
[origin: EP1967659A2] Water delivery system comprises a first line (1) for cold water and a second line (2) for hot water each having a water functional device formed as water treatment units (5a, 5b) and/or water damage protection units. The lines together with connecting devices (3a, 3b), water meters (4a, 4b) and water functional devices form a component group (6). Preferred Features: An assembly frame for connecting the lines and the water functional devices is formed as a frame, plate or housing structure. The lines are connected to the frame via sliding fixing elements. The water treatment units comprise a filter, pressure reducer, softening unit, anti-scale unit and/or a dosing unit.
