Abstract (en)

The invention relates to a method for drying a painted body by circulating aimed air flows in an enclosure (10) from blowing means (2) outside said enclosure (10); through filter means (5) forming a ceiling surface (40) of said enclosure (10). The invention also relates to a drying booth (10), respectively an air circulation device for a drying booth, comprising blowing means (2) outside the drying enclosure (10), connected to individually aimed air nozzles (6) with portions of top ceiling filter means (5) interposed between said blowing means (2) and said nozzles (6).
