Abstract (en)

A headphone includes left and right receivers (20, 30) each including an elongate shell (22) including a peg (221) projecting inwardly from either end; a housing shaped to conform to the shell and including a peripheral wall, a slot in either end, the slot adapted to securely engage with the peg (221), a first receiving space (211) at one portion, a second receiving space (212) at the other portion in communication with the first receiving space, and a plurality of bottom holes; a speaker (25) mounted in the first receiving space; a plurality of buttons including a volume button mounted on a bottom of the second receiving space (212) ; and a cap (23) fitted on the second receiving space ; a band having both ends secured to the caps; and a swivel microphone secured to an outer surface of either receiver. Additional components (e.g., battery) can be mounted in the second receiving space.
