Abstract (en)
[origin: EP1803488A1] A device has an extinguishing material container (10) with a container casing (12) closed on both sides and a piston (20) axially movable in the casing that divides an extinguishing material chamber (22) from a propellant chamber (24). It has a pressurized gas chamber (26) within the extinguishing agent container and spatially separate from the propellant chamber for controlled application of pressure to the propellant chamber, whereby the piston is able to move along the pressurized gas chamber.
