Abstract (en)
[origin: DE102005062861A1] The machine has a motor unit (10a) and a drive unit (12a). Drive mediums (16a,18a,20a) partially formed by using a gear wheel, have a rotational axis (22a) aligned diagonal to a machining axis (14a). The rotational axis exhibits a component extending in the direction of the machining axis. A turn side of the machining axis is arranged on a center of gravity of the motor unit, by a motor shaft.
