Abstract (en)
[origin: WO2007071207A2] A mask for manufacturing of multicolour elastomer skins by distributing of powdered thermoplastics onto the surface of a preheated metallic mould. The mask does contain a body (1) of the mask which is along its perimeter being in contact with the surface of the mould (2) equipped with a perimeter groove (11), in which an elastic sealing (3) is deposited. Furthermore, the body (1) of the mask is equipped with an inlet transfer canal (4) for supply of pressure air into the space under the body (1) of the mask and eventually with at least one flow canal (7) enabling flowing through of a tempering medium as well as with a vacuum transfer canal (5) for creating of vacuum in the space under the body (1) of the mask.
