Abstract (en)

[origin: DE102006015481A1] Roller (01) with the outer surface (02) made of an elastomer material has printing ink or a damp means transported by the rotation of the roller with their lateral surface. The lateral surface, in a stochastic distribution has several open cavities (07) at the lateral surface. The cavities neither have smooth walled nor homogeneous or uniform flanks in the inner side of the roller.
