Abstract (en)  
[origin: WO2007077190A2] The invention relates to a dosing installation (3) for a liquid (7), said installation comprising a control unit (19). The inventive installation (3) is also equipped with a mixing valve (15) which is controlled by means of the control unit (19) and is used to dose the liquid (7) from the recipient. A sensor (16) is used to detect the dosed liquid (7), said sensor comprising a first electrode (20) and at least one second electrode (21) which are electrically contactable via the liquid (7').
