Abstract (en)

[origin: WO2007082167A2] A system and related methods comprising an Internet-hosted application service for online storage, editing and sharing of digital video content and a companion client PC-based video upload application, whereby users can perform the task of editing their video material online while the same material is being uploaded and stored at the remote service, regardless of the size of the material. The Internet-hosted application service can be used on a dedicated website or its functionality can be served to different websites seeking to provide users with enhanced video editing capabilities.
