Abstract (en)
[origin: WO2007074119A1] The invention relates to a method for customising a Web application carried out on a user's terminal (30) by means of a navigator (40), which is provided thereon, upon a request transmitted from the navigator via a telecommunication network (60) to a remote Web server hosting said application consisting in hosting at least one customising program and/or customising data by a local server (20) belonging to a user assigned to the terminal and in customising the application by mixing the customising program and/or customised data items delivered by the local server (20) with data items related to the application corresponding to the processing of the request transmitted by the remote server (10).
