Abstract (en)
[origin: WO2007081894A2] A video door viewer includes a camera housing mounted proximate to an exterior side of a door, and a display housing mounted proximate to an interior side of the door, the camera housing containing a digital imaging device for producing an image from light received through a lens piece with a pinhole in the camera housing and displaying the image on a display in the display housing. A power control is incorporated into the display housing for controlling power to the digital imaging device and to display generation circuitry and the display. A power source, such as one or more batteries, is also contained within the display housing.
