Abstract (en)

[origin: WO2007072039A2] An interactive television user interface (439) that is adapted to allow a user to access a service; receive personalised data inputs for a service for a designated user; store the personalised data for that service and present the stored data to the designated user the next time the service is accessed. The personalised data may include; for example, weather information for a user selected geographic area (444, 441, 442).
