Abstract (en)  
[origin: DE102005063075A1] The headset has a nape holder (10), and two ear pads (20) that are arranged at ends of the nape holder that is pre-tensioned. The ear pads are designed as convex such that the ear pads fit in the form of an outer ear. The ear pads include foam compound that provides static friction between the foam compound and the outer ear. The ear pads have two over-lying sections (22, 23), where the section (23) is adapted to the form of the outer ear such that the earpiece is held by the sections of the pads in or to the outer ear.
