Abstract (en)

[origin: EP1970143A2] Production of die-cast components, especially complex, heavy duty components, comprises feeding metal, especially an aluminum-containing material, as a melt in portions to the die-casting machine. The melt has a fine-grained structure and is fed to the gate (19) at 610 - 650[deg] C and more than 50 m/s : An independent claim is included for a die-casting machine for carrying out the method with a mold comprising fixed (13), movable (15) and floating (16) mold frame sections and a slide (14) mounted in guides.
