Abstract (en)

[origin: EP1970498A2] The arrangement has an enclosure section arranged at a covering section and including a covering limb to enclose free front surfaces of plates laid at an edge area of balcony or terrace. A drainage opening is provided at the enclosure section to drain leakage water accumulated between an end profile and the plates. An elongated, laminar, strip-shaped landing profile (50) includes upper and lower attachment units (52, 60) for attachment at the limb, such that a strip-shaped partial section of the landing profile proceeds over an upper free edge of the limb in the upward direction.
