Abstract (en)

The control device for the production of torques around the longitudinal and transverse axis of a small missile (15) driven over a steering electronics by propellers, comprises wings (11, 12, 13, 14) having aerodynamic flight stabilization rudder-fin (16). The rudder fins are arranged in their number of revolutions over the steering electronics influenceable in their angle of deflection with propeller modules (M1) coupled to the rudder fins. The propeller modules supply the controllable propulsion for the small missile and are directly arranged at the wings. The control device for the production of torques around the longitudinal and transverse axis of a small missile (15) driven over a steering electronics by propellers, comprises wings (11, 12, 13, 14) having aerodynamic flight stabilization rudder-fin (16). The rudder fins are arranged in their number of revolutions over the steering electronics influenceable in their angle of deflection with propeller modules (M1) coupled to the rudder fins. The propeller modules supply the controllable propulsion for the small missile and are directly arranged at the wings. The propeller comprises electric motors fed by the main battery of the small missile. The propeller modules supporting the rudder fins are arranged at a tail or nose of the small missile forming control surfaces (22, 23).

Abstract (de)

Steuereinrichtung zur Erzeugung von Drehmomenten um die Längs- und Querachse eines über eine Lenkelektronik fernlenkbaren propellergetriebenen Kleinflugkörpers (15) mit der aerodynamischen Flugstabilisierung dienenden, angelenkte Ruderfinnen (16 bis 19) aufweisenden Flügeln (11 bis 14), denen in ihrer Drehzahl über die Lenkelektronik beeinflussbare in ihrer Winkelauslenkung mit den Ruderfinnen (16 bis 19) gekoppelte Propeller-Module (M1 bis M4) zugeordnet sind; (vgl. Figur 1)
