Abstract (en)

[origin: EP1970778A1] The timepiece (1) has a power reserve indicator device with a differential gear frame which is arranged coaxially with respect to a barrel arbour (12). The secondary output of differential gear is secured to a barrel cover. The differential gear output is obtained by an inner tooth crown which is kinetically connected to primary input by the planetary wheel sets meshed with each other, and carried by the barrel cover.
