Abstract (en)
[origin: EP1970919A2] The electromagnetic coil has a spool (1), a winding from magnet wire (2) and two contact pins (3,4). The contact pins are fastened to a springy retaining element (5) and are movable relative to the spool. The retaining element is formed in one piece with the spool and ends (2a,2b) of the magnet wire are fastened to the movable or springy contact pins.
