Abstract (en)
[origin: WO2007079599A1] The invention relates in general to a process for producing shaped food products, in particular pastry products, and an apparatus for producing such shaped products (P) from a moulding composition (M) which displays liquid flow, powder flow or is paste-like. In particular, the invention relates to a punch (4) which is applied to a punch block (26, 68') by means of an elastic membrane (60), by means of which a corresponding cold pressing process for producing pastry products can be carried out.
