Abstract (en)
[origin: DE102006001800A1] Suction rollers are used to extract the blanks (11) from below the magazine (21) stack (20), which is optionally in banderole form. The suction rollers turn in bearings on an extraction device, a continuously-rotating extraction roller, and include suction holes to pull off single blanks. Rotations of the extraction roller and of the suction rollers are matched, to take the blank from the base of the stack and to transfer it to the blank conveyor or to a lay-on roller.
