Abstract (en)  
[origin: WO2007065228A1] A continuous hypochlorite generator is disclosed. The apparatus includes a brine tank (9), a make-up water line (15), a flow controlled electrolysis cell (19) fitted with electrodes (20), a salinity / flow sensor (31), a temperature sensor (27), a dosing line (23) and control means accepting input from each of said salinity / flow and temperature sensors and controlling said brine source and said make up water supply to maintain salinity and flow in said electrolysis cell and apply power to the electrodes within respective preselected ranges.
