Abstract (en)
[origin: WO2007080307A1] The present invention relates to a circuit breaker (1) comprising an input electrical terminal intended to be connected to a storage battery (100), an output electrical terminal, contact means designed to open or close the electrical contact between the two input and output electrical terminals, and means for measuring characteristics of said storage battery. According to the invention, the circuit breaker includes a medium-range radio transceiver (40) designed to transmit and receive a radio signal relating to characteristics of batteries (101).
