Abstract (en)
[origin: EP1972362A2] The device has an electromotor (20) fastened at a rear supporting frame (26), and a slot for an accumulator (22), where the slot is provided at the supporting frame or the electromotor. The accumulator is electrically connected with the electromotor, where the electromotor has a coupling part (48) for a fluid pump (24). The fluid pump has a coupling piece, which is adapted to the coupling part, where the fluid pump is arranged above the electromotor, and is a compressor or a hydraulic pump. The slot has a guiding unit provided at the supporting frame.
