Abstract (en)
[origin: EP1972417A1] An eyebrow beautifying apparatus having a comb-tooth shaped fixed blade and movable blade, including: a substantially tube-shaped grip unit (10) accommodating a motor (12) and a battery (14); a head unit (24) which is comprised of a rod section (28), extending linearly from the grip unit (10) and having a smaller diameter than the grip unit (10), and a flat section (30), provided at a tip end of the rod section (28) and having a width smaller than a diameter of the grip unit (10); a comb-tooth shaped fixed blade (52) and movable blade (50) that are accommodated in the flat section (30) and protrude in a longitudinal direction of the head unit (24) from a tip of the flat section (30); and a transmission member (36) inserted inside the rod section (28) for transferring a driving force of the motor (12) to the movable blade (50) and reciprocally driving the movable blade (50).
