Abstract (en)
[origin: EP1972567A1] The tray (1) has a base wall (2) and lateral walls (3-6) that are formed of a rigid frame (40, 60) supporting a panel, where the frame is articulated along the base wall. The lateral walls have profiles fixed to the base wall by a flexible attachment. The attachment forms an articulation between the profile and the base wall that has other profiles (21-24) along its edges. The former profiles are guided along latter profiles and are fixed to the latter profiles by the attachment, where the profiles are co-extruded with the attachment.
