Abstract (en)
[origin: EP1972748A2] The construction has an insulating glass pane (1) fixed at a lower construction (2), where the glass pane has a groove (3) at an edge side in partial areas. A glass pane holding device (5) has a holding arm (4) that is engaged in the groove, and is fastened at a connection profile (6) of the lower construction, where the connection profile has a screw groove. The holding arm is pivotably attached at an attachment stand (7) of the holding device, where the attachment stand has a U-shaped connecting unit, and is firmly attached at the connection profile using the connecting unit.
