Abstract (en)
[origin: EP1973216A2] The motor carrier (10) has a plate shaped base (20), a pedestal (30) arranged for support of a stator and a king pin (40) that is arranged at the pedestal for mounting a rotor. The pedestal is casted, where the king pin is connected as separate part by sealing with the pedestal. The plate shaped base is formed as steel sheet piece, where the pedestal is attached. An independent claim is also included for a method for manufacturing a motor carrier for an electric motor.
