Abstract (en)

[origin: WO2007085388A1] The invention relates to an electrically adjustable furniture piece (1, 12) having at least one electric drive motor (4), at least one controller (5) for actuating the drive motor (4), and a display apparatus (9), which furniture piece (1, 12) is characterized in that the controller (5) is designed to encode operating state data into a state code, and the display apparatus (9) is designed to display the state code such that it can be transmitted to an evaluation unit (21) for servicing purposes. The invention furthermore relates to a method for servicing an electrically adjustable furniture piece (1, 12).
