Abstract (en)

[origin: WO2008095902A1] The invention relates to a method for comminuting material to be ground using a roller mill (1) which comprises a grinding plate, at least one grinding roller and at least two drives (13, 14) for driving the roller mill, wherein there is provided a power-matching controller (22) for the drives (13, 14) which by controlling the rotational speed of at least one drive controls the power of the drives (13, 14) at a predetermined ratio to one another.
