Abstract (en)
[origin: WO2007120935A1] A partition insert (100) includes a longitudinal primary partition panel (12), transverse divider panels (14, 16, 18, 20, 22), and a locking flap (26). The divider panels (14, 16, 18, 20, 22) are rotated to an operative position and the locking flap (26) is rotated toward the primary partition panel (12). The partition insert includes means for engaging (52) such that the divider panels (14, 16, 18, 20, 22) and the locking flap (26) can engage one another to fix the position of the divider panels (14, 16, 18, 20, 22) in the operative position.
