Abstract (en)

[origin: FR2895756A1] The housing has cover part (32) opened in its center and independent of a body (30). The cover part is positioned on the body such that it covers a peripheral edge of a toilet bowl, where the bowl is made of stainless steel, wood or composite/plastic material. The body has an anchoring part (5) interacting with the cover part and comprising a transversal massive part (51) with a shape complementary to the shape of a housing (330) of the cover part, where the anchoring part constitutes a base of a water reservoir (54) supplying the bowl. An independent claim is also included for an assembly constituted of a toilet bowl.
