Abstract (en)  
[origin: WO2007082700A1] The invention is based on a gas exchange valve actuating device having a lever (10), for transmitting a drive movement to at least one gas exchange valve (11, 12), and having an internal combustion engine braking unit (13). It is proposed that the internal combustion engine braking unit (13) is coupled in terms of drive to the lever (10) at least in a braking mode.
