Abstract (en)

[origin: WO2007079077A2] A semiconductor-on-insulator structure including first and second layers which are attached to one another either directly or through one or more intermediate layers. The first layer includes a substantially single crystal germanium semiconductor material while the second layer comprises a glass or a glass-ceramic material having a linear coefficient thermal of expansion (25-300 °C) which is within the range of +/- 20x10⁻⁷/°C of the linear coefficient thermal of expansion of the germanium first layer.
