Abstract (en)

[origin: EP1974650A2] The house hold appliance has a light signal unit (32) and a control unit (48). The light signal unit is provided for display of information by a light signal and a carrier unit (34) for storing light signal unit. The carrier unit has a subarea (38) for storing light signal unit, which is raised from a household appliance view surface (36). The carrier unit is formed by actuation medium (28).
