Abstract (en)
[origin: EP1975034A2] The system has a data processing unit (1) arranged with central processors (2, 3). A receiver device (10), a storage unit (11), a satellite navigation device (12), a digital radio channel, a rail and speed sensor (14) and a pressure sensor are connected with inputs/outputs of a microprocessor unit (19). A display and input unit and a command transfer unit are connected to the outputs of the microprocessor unit. A control device (17) has control elements provided for a brake line. Auxiliary inputs and outputs of the unit are connected to a multifunction vehicle bus (4) by a gateway.
