Abstract (en)

A frame structure (10) includes a first frame portion (11) and a first support portion (31). The first frame portion (11) defines a first space (12) for fittingly receiving therein a portion of a sheet feed cassette (35A) containing recording sheets. The first support portion (31) is configured to support a cover member (30) for pivotal movement for optionally closing the first space (12). The first support portion (31) is configured not to project into the first space (12).
