Abstract (en)
[origin: EP1975287A1] Apparatus has an endless laying carriage conveyor belt (14) that travels around exclusively in the laying carriage (5). It has upper and lower strands (14o,14u) that extend between one of the laying rollers (12) and a deflecting roller (15) around which they partially wrap. A certain length of the card web (11) to be laid is supported from underneath by upper strand of the laying carriage conveyor belt in the section adjacent to the laying gap. This length is covered by a portion of the web entrance conveyor belt (6) that extends between the upper carriage (4) and the laying carriage.
