Abstract (en)

[origin: EP1975304A1] The machine (1) has a steam generator (12) that is supplied with water by a water storage (19), when steam is generated. A control unit (23) e.g. open thermostat, is placed in a pipeline (15) of a hot air circuit (4) of an unshielded heater (6) to control temperature of the heater before introduction of the steam in the pipeline of the circuit. The control unit is connected in series with a safety thermostat and a regulation thermostat of the steam generator.
