Abstract (en)

[origin: EP1975346A1] A quickly pitching tent with multiple extendable poles (40) has a frame (10) and a cloth housing (20). The frame (10) has multiple poles (40). Each pole (40) has an extendable top section (41), a middle section (42), a bottom section (43) and two joints (45) pivotally connecting the sections (41, 42, 43) to each other. The top section (41) has an outer tube (411) and an inner tube (412) mounted slidably in the outer tube (411) and selectively extending out of the outer tube (411). The top sections (41) are extendable to change the width of the tent. Therefore, the tent accommodates different numbers of campers. Furthermore, when the top sections (41) are completely retracted, the top, middle and bottom sections (41, 42, 43) have the same length to facilitate storage of the tent.
