Abstract (en)

[origin: EP1975366A1] The cabinet has a deformable closing curtain (20) sliding in slides (25) arranged in opposite parts of the cabinet. The curtain has a flexible unitary wall (50) comprising a surface (51) that is smooth and another surface (52) that presents a rigidifying rib (60). The rib has rigid plastic bars (61) comprising free ends (70) received in the slides while ensuring guiding of the curtain in the slides. Each bar is maintained in continuous contact with entire dimension of the surface (52).
