Abstract (en)
[origin: DE202007004680U1] Device (1) for arranging a heating body, especially a tubular radiator, comprises a fixing element (2) with at least one holding element (3) having a clamping mechanism for coupling to and actuated by an actuating element (4) positioned so that it is directly accessible by a tool when the heating body is arranged in a certain manner. Preferred Features: The holding element is rotatably arranged on the fixing element. The actuating element is arranged on the side of the holding element and is connected via a clamping element (10) to the clamping mechanism of the holding element.
