Abstract (en)

[origin: EP1975748A1] The case has a middle point (1) made of carbon fiber or sapphire and located between upper and lower bands (2, 3) made of metal. Projection components e.g. horns, are fixed to a wrist-watch strap. Parts (17, 19) of the components are defined by the bands, respectively. A hook (20) and a notch (21) are cooperated with each other for assembling the parts. The bands are turned, during the assembly of the case, with respect to each other around an axis (A) of the case from a position where the hook and the notch are not cooperated, to another position where the hook and the notch are cooperated.
