Abstract (en)

[origin: EP1975962A1] The device (1) has housing (2), where a receiving device (4) is provided for completely receiving an over voltage protector in the housing. The receiving device has an interface for electrical contact of the over voltage protector, where the receiving device is provided at a front side of the switching device. The receiving device includes fastening elements for fastening the over voltage protector in the receiving device. The housing has a covering element (6) for closing the switching device.
